

FARAMA

GARDEN

We combine the durable and comfortable products we produce with the inspiration we get from nature

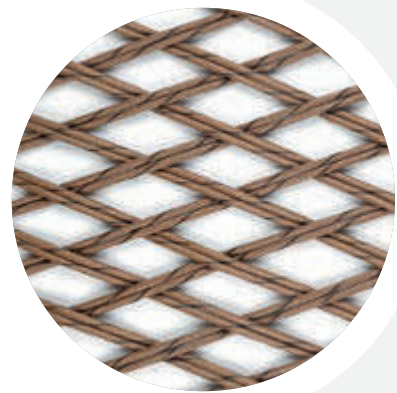

for details.

Handcrafted

Each model we produce is handcrafted as a result of a difficult process that requires intensive labor. Our rattan rope models with different colors and patterns turn into unique designs as a result of the days-long production process in the hands of experienced craftsmen.

Each product created by our craftsmen, who are specially trained for each model knitted with different knitting methods, is unique.

Rattan Elegance

We produce different models that you can use in all outdoor living areas such as gardens and balconies using natural-looking synthetic rattan ropes. We bring together the quality and stylish appearance of rattan weave with unique designs and offer it to your liking.

With our durable and UV-protected rattan weave models, we provide a long-lasting use as well as a stylish appearance.

DOĞAL ÇİZGİLER

Natural Line

We transform naturalness into livable furniture by combining rattan weave broken from nature with the lines of the modern world. With each of our specially designed models, we work diligently to ensure that the image we will add to living spaces is in harmony with nature.

en, we stand on the line of development with the inspiration we get from nature. We carefully determine the lines in our designs by anticipating the value that each of our products will add to living spaces. We act without breaking away from the natural and believe that quality and aesthetics should be considered together with the unique beauty of nature.

YERELİN ESTETİĞİ

Aesthetics of the Local

As Garden, we love the unique features of the land we live on. We believe that everything our country has at its core is at standards that can compete with the world.

For this reason, we take care that the products we produce come from local and support local development. We believe that what is produced in our country can be as high quality as what is produced in the world and we contribute to national development by sourcing the materials we use in our products from local suppliers.
